

The Medisoft® Solution

My practice will ~~not~~ be
ANSI 5010 compliant before 2012!

Make your mark on ANSI 5010 compliance with Medisoft®

Medisoft® will help you prepare for the new realities of healthcare finance with Medisoft® v17—the ANSI 5010-compliant practice management solution from McKesson. With a host of new features and enhancements, Medisoft v17 increases the efficiency of scheduling and billing, and improves the quality of reporting and revenue management.

With the challenges of implementing healthcare changes, it pays to adopt early and allow time for testing prior to the January 2012 ANSI 5010 transition. Start the process now and reduce the risk of rejected claims and decreased cash flow as ANSI 5010 is adopted.

Make moving to a combined PM/EHR in Medisoft® Clinical part of your upgrade.

Medisoft® Clinical seamlessly combines the Medisoft v17 practice management system with our award-winning EHR to help you greatly improve financial performance and the overall patient experience.

Medisoft Clinical was specially designed for Medisoft users, which makes it the least disruptive path to Meaningful Use for Medisoft users with a fully optimized interface and practice workflow.

Medisoft® v17

In addition to ANSI 5010 compliance, Medisoft® v17 features an array of enhanced capabilities:

- Office Hours Professional included — enhances scheduling workflow
- BillFlash™ integration — enables submission of patient statements to BillFlash directly from Statement Management (no manual upload)
- Revenue Management click reduction — automates the majority of the clicks currently required to submit a claim
- Configuration enhancements — simplify ERA processing
- Advantage 10.0 performance improvements — improve workflow and drive practice productivity
- And much more!

Act now and save! Contact us today to learn more.

Uncap the true potential of your practice.
